

## **AutoCAD 2000-2009**

Denver Service Center, National Park Service

This readme.txt provides information for installing and using the NPS AutoCAD 2008 tools. These files are intended for use with AutoCAD 2000, 2001, 2002, 2004, 2005, 2006, 2007 and 2008 WHEN NOT ON THE Denver Service Center NETWORK. This version is not compatible with 64 bit versions of Windows.

These tools are not for use with AutoCAD release 13 or 14. If you already have the NPS R13/14 customization installed, you must install these NPS AutoCAD tools to a DIFFERENT location.

---

Instruction for installing the NPS AutoCAD 2008 tools.

### **Contents:**

NPS AutoCAD 2008 tools, including AutoLISP routines, template drawings, standard symbols, standard details.

### **How to use:**

Step 1. Download Npstools.zip by clicking on it's link from the page where you found this readme file. Choose the "Save this program to disk" option, which will transfer Npstools.exe to your hard drive.

Step 2. Install the files:

To install the NPS AutoCAD Tools, unzip the accompanying npstools.zip file and follow the directions.

You can install these tools in any folder on a local or network drive. It is NOT recommended that you install the NPS Tools to any folder underneath your AutoCAD installed folder.

Step 3. Configure AutoCAD:

Follow the instructions that are presented at the end of the installation (step 2)

Once you successfully complete step 3, the NPS tools will automatically load each time you start AutoCAD.
